Odysseus finished his service to Caesar and the Legion, becoming a rancher at Wolfhorn Ranch while traveling through the debris and taking an occasional messenger job. If you have got all Ed-E updates or all Ulysses Holotapes, the player's character does not need to pass the speech check. He was horrified when the white legs braided his hair like his ancient tribe, hair twisted once, as a way of honoring him. Despite Ulysses' efforts to save the community of both armies, disaster struck when the messenger delivered a package from the former Navarro enclave base to the division for the NCR. The package contained a device with launch codes for nuclear missiles lying dormant in nearby underground silos. Ulysses managed to survive thanks to several medical eyes. Caesar told him not to kill other couriers because, in fact, many couriers were also spies for the Legion. If one decides to fight him, keep in mind that Ulysses has a lot of health, is able to use stealthy guys, as well as flash-bangs. Ultimately, the messenger would survive thanks to Victor and Doc Mitchel at Goodsprings. The division was destroyed and most of the inmates were killed. Finally, he spoke with the group of experts who ran Big Mountain, learning that the division was one of his testing grounds. QUEST STAGES StagestatusDescription10 track Ulysses in his temple.20 Optional: Rescue ed-e.30 Deal with Ulysses.35 HAT OF MEN marked.40 Optional: Disable the eyes of Ulysses. In the base game, Johnson Nash at Primm refers to this person at Primm, who explains that they were originally destined to bring the package that almost killed to the courier service. The twisted hairs were conquered and enslaved just as it had done to the other tribes of Arizona, erasing their identities and those who resisted along the I-40 road. The messenger must now deal with Ulysses. He sees the NCR as too much like the old United States that led to the Apocalypse in the first with laws that hinder the livelihoods of its citizens and an army too small to defend its borders. The marked men will show up after the battle begins, or after convincing Ulysses to fight alongside the player's character. [verified]. Odysseus saw it as a hollow gesture that mocked the memory of his tribe. Grant from centuries ago. You can open the door to the main hallway, which leads to Ulysses, and also to the maintenance bot room, which contains ED-E. He also sees House's efforts to recreate a pre-war Vegas as an unwillingness to let go of many old-world values that should have been left behind. [checking late] Throughout the Messenger's travels through the Mojave in Fallout: In New Vegas, players can't help but notice that there is someone who knows who the shadow of every move is. He was also one of the first members of the Legion to discover the Hoover Dam. New Vegas and the armies that came from the Republic of New California. This ends the search and will trigger The End or The Apocalypse, depending on what the player character chose. Along the way, they learned about this mysterious rival messenger whose actions set the events of Dead Money, Honest Hearts and Old World Blues in motion. Although the true identity of Ulysses is unknown, he chose his name in honor of General and President Ulysses S. In all the major DLCs after, he is mentioned until finally, during the Lonesome Road events, he is revealed as Ulysses. Unfortunately, the NCR annexed the territory. This caught the attention of Caesar, who sent a small army to deny the city and the trade route. As he mourned the loss of his tribe, Odysseus remained loyal to the Legion, acting as a Frumentary agent to trick more tribes into eventually being assimilated as his own. During his travels, he found the Big MT research facility, where he came across the rogue Elder, Father Elijah, directing him to the Sierra Madre Casino, predicting that it would lead to his death. Once the marked men are dealt with, one can either attempt to stop the warheads, or launch them at a target of the Courier's choosing. Quick walkthrough Quest: The Courier Enter Ulysses' Temple. In 2281, right before the events of New Vegas began, Ulysses was hired by the Securitron Victor to deliver the Platinum Chip to Mr. House in New Vegas. He did this to honor the Legion's old rule not to kill fellow couriers -- while hoping that some party in the Mojave would kill them for the package. This nearly happened when Benny took the Chip, shot the Courier and theft them for dead. Eventually, Ulysses would contact the Courier, challenging them to come to the Divide and find him for a long-awaited confrontation. [verified] Xbox 360 in some cases after using the terminal to free ED-E the pod will not open, and ED-E will not be able to be rescued. rescued.
